Knowledgeable and patient tutor

Jay was very knowledgeable in Calc and was very patient in explaining each problem step by step. He was very helpful and would also ask to make sure I understood the concepts before moving to the next step in the problem.

Best tutor ever!

I had a test for linear algebra, and before our lesson, I felt completely clueless. When we met up, he had a whole lesson prepared -- lots of challenging questions and solutions -- and he these bizarre linear algebra concepts so clearly. He's also super friendly and passionate about math. Thanks again Jay!

Knowledgeable tutor

Jay taught me Calc 2(business calc) and knew exactly what he was talking about and helped me understand certain concepts on a deeper level level. If I didn't know how to do something, he didn't make me feel bad about it. Instead, he showed me ways that I could understand much more easily. Great tutor!

Super nice and really patient.

Was really patient in teaching me even basic concepts. Have been really lost in the class and everything was cleared up after the tutoring session, so i would definitely reccommend!
